## **"Machine-building enterprise KOMPO" LLC**

The KOMPO Company was founded in Brest in 1991. Nowadays we focus on the production of equipment for meat and dairy industry, offering complete solutions for the production of sausage products, spreadable processed cheeses and animal feeds. Diversified product range equally suits small industries and large meat processing plants. All company products meet EU safety, health and environmental protection requirements, are accordingly certified and have the CE-marking affixed. The KOMPO Company is a developer of equipment for the food industry with its own design office and testing facility. The KOMPO Company has representation offices in 43 countries, while its 7 authorized service centers in Belarus, Russia, Kazakhstan and the Ukraine employ more than 200 certified service specialists. KOMPO's authorized service centers are well integrated into all units of the distribution network thus enabling to perform maintenance and repairs in the shortest possible time. 5C and Kaizen systems implemented at KOMPO allow the company to reduce costs, increase productive efficiency as well as engage personnel in continuous improvement of the company's processes and activities.

### **Manufactured products:**

Equipment for the production of sausages, spreadable processed cheese and portioned minced meat:

- Vacuum screw fillers for enterprises of various capacities
- Clippers (manual, semi-automatic and automatic)
- Grinding systems
- Column loaders
- Machines for flocking frozen food blocks
- Crate washing machines
- Machines for packing vegetables, fruits and nuts
- Sausage linker twists
- Volumetric precise dosing machines
- Date marking devices
- Sausage production lines

### **Consumables:**

- Clips (continuous, U-shaped, flat) competing with such global brands as Poly-Clip, Lorenzo Barroso. KOMPO clips are suitable for Poly-Clip clippers.
- Sausage string loops available in two versions and of different colors:
  1. Individual loops for manual delivery during the clipping;
  2. Glued on tape for automatic delivery during the clipping.
- Labeling tapes

Spare parts for equipment.

Metalworking:

- Lathe turning
- Milling
- Grinding / polishing
- Electro discharge machining
- Mortising / slotting processing
- Gear-shaping processing
- Welding works
- Thermal treatment
- Waterjet cutting of metal
- Metal sheet bending / forming
- Manufacturing of medals, statuettes and metal compositions
- Laser etching / engraving
- Manufacturing of components according to customer's drawings

With kind regards,  
the KOMPO company.
